

In the Claims

Please amend the claims as follows:

---

1. (Amended Twice) An apparatus, comprising:

a base;

a device connected to the base; and

a cover including a one-piece plastic body and at least one electrically conductive lead,

wherein the body is connected to the base such that the device is enclosed by the body, and

wherein the electrically conductive lead includes an exposed portion electrically connected to the device.

---

14. (Amended Twice) An apparatus, comprising:

a base;

a device connected to the base;

a cover including a one-piece plastic body and at least one electrically conductive lead,

wherein the body is connected to the base such that the device is enclosed by the body such that

an inner surface of the body of the cover and an upper surface of the device define an air gap

therebetween, and wherein the electrically conductive lead includes an exposed portion; and

an electrically conductive bump electrically connected between the device and the exposed portion of the electrically conductive lead.
